

K-LOVE serves me, and many others, as a resident in the Des Moines area by being a beam of positive music and stories that are not high-lighted on other main-stream stations. By playing no commercials, me and my children are not driven to go out and spend, spend, spend on ourselves, but look to those who need help. This station is for the greater good of all the public and can only make a positive impact on those listening. It cannot be displaced by an LPFM broadcaster. This is a powerful impact station that must continue.

Without the K-LOVE signal from my little FM radio, I will be very disappointed. I was totally shocked to hear that such an issue was at hand. Are you at the FCC human?
